Metaraminol Juno

Active ingredient(s): *Metaraminol (as tartrate)*

Consumer Medicine Information (CMI)

This leaflet provides important information about using Metaraminol Juno. **You should also speak to your doctor or pharmacist if you would like further information or if you have any concerns or questions about using Metaraminol Juno.**

Where to find information in this leaflet:

- [1. Why am I using Metaraminol Juno?](#)
- [2. What should I know before I use Metaraminol Juno?](#)
- [3. What if I am taking other medicines?](#)
- [4. How do I use Metaraminol Juno?](#)
- [5. What should I know while using Metaraminol Juno?](#)
- [6. Are there any side effects?](#)
- [7. Product details](#)

1. Why am I using Metaraminol Juno?

Metaraminol Juno contains the active ingredient **metaraminol tartrate**. Metaraminol Juno is a sympathomimetic amine. It strengthens the contraction of the heart muscle and constricts blood vessels to help increase the blood pressure.

Metaraminol Juno is used to increase your blood pressure which can drop during spinal anaesthesia or can drop as a reaction to medications or surgical complications.

2. What should I know before I use Metaraminol Juno?

Warnings

Do not use Metaraminol Juno if:

- you are allergic to metaraminol tartrate, or any of the ingredients listed at the end of this leaflet.
- Always check the ingredients to make sure you can use this medicine.
- you are being given cyclopropane or halothane anaesthesia (unless clinical circumstances demand their use).
- the solution is discoloured, cloudy, turbid, or a precipitate is present.

Check with your doctor if you:

- have any other medical conditions
 - liver disease
 - heart or thyroid disease
 - high blood pressure

- diabetes
- malaria
- have allergies to any other medicines or any other substances including foods, preservatives or dyes.
- take any medicines for any other condition

During treatment, you may be at risk of developing certain side effects. It is important you understand these risks and how to monitor for them. See additional information under Section [6. Are there any side effects?](#)

Pregnancy and breastfeeding

Check with your doctor if you are pregnant or intend to become pregnant.

Talk to your doctor if you are breastfeeding or intend to breastfeed.

Children

- Metaraminol Juno is not recommended for use in children.

3. What if I am taking other medicines?

Tell your doctor or pharmacist if you are taking any other medicines, including any medicines, vitamins or supplements that you buy without a prescription from your pharmacy, supermarket or health food shop.

Some medicines may interfere with Metaraminol Juno and affect how it works.

- certain medicines used to treat depression, e.g. Monoamine Oxidase Inhibitors (MAOI's) or Tricyclic antidepressants (TCA's)
- digoxin, a medicine used to treat heart failure

Check with your doctor or pharmacist if you are not sure about what medicines, vitamins or supplements you are taking and if these affect Metaraminol Juno.

4. How do I use Metaraminol Juno?

Metaraminol Juno must only be given by a doctor or nurse.

How much Metaraminol Juno is given

Your doctor will decide what dose of Metaraminol Juno you will receive and how long you will receive it for. This depends on your medical condition and other factors, such as your weight.

How Metaraminol Juno is given

- Metaraminol Juno is administered in a hospital as an injection into a vein or diluted before use and given with fluids into a vein.

If you use too much Metaraminol Juno

As Metaraminol Juno is always given to you in a hospital under the supervision of a doctor, it is unlikely that you will receive an overdose.

However, you should tell your doctor or nurse immediately if you feel unwell at all whilst you are being given Metaraminol Juno. You may need urgent medical attention.

Symptoms of an overdose may include:

- nausea and/or vomiting
- excessive sweating
- breathlessness
- tightness or pain in the chest
- fast or slow heart beat
- feeling of happiness
- convulsions, fits or seizures

You should immediately:

- phone the Poisons Information Centre (by calling 13 11 26), or
- contact your doctor, or
- go to the Emergency Department at your nearest hospital.

You should do this even if there are no signs of discomfort or poisoning.

5. What should I know while using Metaraminol Juno?

Things you should do

- Always follow your doctor's instructions carefully.
- Your doctor or nurse will monitor your blood pressure.

Remind any doctor, dentist or pharmacist you visit that you are using Metaraminol Juno.

Driving or using machines

Be careful before you drive or use any machines or tools until you know how Metaraminol Juno affects you.

Drinking alcohol

Tell your doctor if you drink alcohol.

Looking after your medicine

- Metaraminol Juno should only be given to you in a hospital.
- It should be kept in the original packaging until it has been given to you.
- Metaraminol Juno must be stored below 25°C, protected from light. Do not freeze.

Keep it where young children cannot reach it.

Getting rid of any unwanted medicine

Metaraminol Juno should only be given to you in a hospital therefore the doctor or nurse will dispose of any left over.

Do not use this medicine after the expiry date.

6. Are there any side effects?

All medicines can have side effects. If you do experience any side effects, most of them are minor and temporary. However, some side effects may need medical attention.

See the information below and, if you need to, ask your doctor or pharmacist if you have any further questions about side effects.

Serious side effects

Serious side effects	What to do
Heart related <ul style="list-style-type: none">• fast or pounding heartbeat	Call your doctor straight away, or go straight to the Emergency Department at your nearest hospital if you notice any of these serious side effects.
Allergic reaction related <ul style="list-style-type: none">• swelling of the face, lips, mouth or throat which may cause difficulty in swallowing or breathing.• breathlessness or any difficulty breathing	

Tell your doctor or pharmacist if you notice anything else that may be making you feel unwell.

Other side effects not listed here may occur in some people.

Reporting side effects

After you have received medical advice for any side effects you experience, you can report side effects to the Therapeutic Goods Administration online at www.tga.gov.au/reporting-problems. By reporting side effects, you can help provide more information on the safety of this medicine.

Always make sure you speak to your doctor or pharmacist before you decide to stop taking any of your medicines.

7. Product details

This medicine is only available with a doctor's prescription.
