On the Radar

Issue 464
18 May 2020

_On the Radar_ is a summary of some of the recent publications in the areas of safety and quality in health care. Inclusion in this document is not an endorsement or recommendation of any publication or provider. Access to particular documents may depend on whether they are Open Access or not, and/or your individual or institutional access to subscription sites/services. Material that may require subscription is included as it is considered relevant.

_On the Radar_ is available online, via email or as a PDF or Word document from [https://www.safetyandquality.gov.au/publications-and-resources/newsletters/радar](https://www.safetyandquality.gov.au/publications-and-resources/newsletters/радar)

If you would like to receive _On the Radar_ via email, you can subscribe on our website [https://www.safetyandquality.gov.au/publications-and-resources/newsletters](https://www.safetyandquality.gov.au/publications-and-resources/newsletters) or by emailing us at mail@safetyandquality.gov.au. You can also send feedback and comments to mail@safetyandquality.gov.au.

COVID-19 resources

The Australian Commission on Safety and Quality in Health Care has developed a number of resources to assist healthcare organisations, facilities and clinicians. These and other material on COVID-19 are available at [https://www.safetyandquality.gov.au/covid-19](https://www.safetyandquality.gov.au/covid-19)

The latest additions include:

- **Break the chain of infection: Stopping COVID-19** poster

- **COVID-19: Elective surgery and infection prevention and control precautions**

- **FAQs for clinicians on elective surgery**

- **FAQs for consumers on elective surgery**

- **Infection prevention and control Covid-19 PPE** poster
• **Special precautions for Covid-19 designated zones** poster

• **COVID-19 Medicines management: Position statements on medicine-related issues**,  

• Potential medicines to treat COVID-19
The impact of the “opioid epidemic” in North America is quite well known. It has, to some extent, been thought that there is not a similar issue with opioid misuse in Australia. However, as this report confirms, while it may not be on the same scale, the misuse and illicit use of opioids in Australia is substantial. This is true in terms of direct morbidity and mortality and in the tangible and intangible economic costs.

Based on the examination of the impact of ‘extra-medical opioid use’ (includes both the illegal use of opioids such as heroin, and the misuse of pharmaceutical opioids) in one year, the report’s authors ‘identified 2,203 deaths with over 70,000 years of life lost’, almost 32,000 hospital separations.

The tangible costs of extra-medical opioid use amount to $5.63 BILLION
- $2.48 billion - Premature death
- $936 million - Drug-related crime
- $481 million - Road traffic accidents
- $1.08 billion - Healthcare costs
- $459 million - Workplace costs
- $194 million - Other (including prevention programs)
- $127 million - Specialist drug treatment including opioid substitution therapy
- $85 million - Other health costs
- $41 million - Ambulance and Emergency Department services
- $31 million - Outpatients

The intangible cost of extra-medical opioid use is $10.13 BILLION
due to the premature death of 2,203 people and over 70,000 years of life lost.

The total cost of extra-medical opioid use is $15.76 BILLION

*How and under what circumstances do quality improvement collaboratives lead to better outcomes? A systematic review*

Zamboni K, Baker U, Tyagi M, Schellenberg J, Hill Z, Hanson C

<table>
<thead>
<tr>
<th>DOI</th>
<th><a href="https://doi.org/10.1186/s13012-020-0978-z">https://doi.org/10.1186/s13012-020-0978-z</a></th>
</tr>
</thead>
</table>
| Notes | It can seem that lamenting the failure of quality improvement initiatives to actually lead to sustained improvement is more common than success with quality improvement. This paper reports on a review that sought to examine the literature for the 'contextual factors influencing intended outcomes and to identify how quality improvement collaboratives may result in improved adherence to evidence-based practices'. Based on 32 studies, the authors found (although the evidence was not always strong):

  - Adequacy and appropriateness of external support, functionality of quality improvement teams, leadership characteristics and alignment with national systems and priorities may influence outcomes of quality improvement collaboratives.
  - Participation in quality improvement collaborative activities may improve health professionals' knowledge, problem-solving skills and attitude; teamwork; shared leadership and habits for improvement.
  - Interaction across quality improvement teams may generate normative pressure and opportunities for capacity building and peer recognition. |

**COVID-19: Patient Safety and Quality Improvement Skills to Deploy during the Surge**

<table>

</thead>
</table>
| Notes | This piece stresses how useful patient safety and quality improvement expertise (and thus experts) can be in time of crisis and rapid change. The authors provide ‘a five-step strategy and actions through which PS and QI staff can meaningfully contribute during a pandemic by employing their core skills to support patients, staff, and organizations.’

1. **Strengthen the system** by assessing readiness, gathering evidence, setting up training, promoting staff safety, and bolstering peer support.
2. **Engage** with citizens, patients, and their families so that the solutions are jointly achieved and owned by both the healthcare providers and the people who receive care, and in particular the citizens who are required to undertake preventative interventions.
3. Work to **improve care**, through actions such as the separation of flows, flash workshops on teamwork, and the development of clinical decision support.
4. **Reduce harm** by proactively managing risk to both COVID-19 and non COVID-19 patients.
5. **Boost and expand the learning system**, to capture improvement opportunities, adjust very rapidly, and develop resilience. This is crucial as little is known about COVID-19 and its impacts on patients, staff, and institutions. |
A new issue of *Nursing Leadership* has been published with a focus on **Nursing Leadership in Corrections**. Articles in this issue of *Nursing Leadership* include:

- **Healthcare in Secure Environments**: Leading a Collaborative for Forensic Nursing Education (Lorna J Butler and Monique Mallet-Boucher)
- Nursing Leadership Implications for Clinical Placements in Corrections (Landa Terblanche and Sheryl Reimer-Kirkham)
- **Improving Care at Correctional Facilities**: Listening, Learning and Creating Change from a Patient Care Quality Office (Matthew Simon, Karen Salamat and Kris Gustavson)
- The Role of Nursing Leadership in Ensuring a Healthy Workforce in Corrections (Joan Almost, Wendy Gifford, Linda Ogilvie and Crystal Miller)
- Barriers to and Strategies for Gaining Entry to Correctional Settings for Health Research (Erin Kitt-Lewis, Susan J Loeb, Valerie Myers, Tiffany Jerrod, Rachel K Wion and Julie I. Murphy)
- Mother-Child Programs for Incarcerated Mothers and Children and Associated Health Outcomes: A Scoping Review (Martha Paynter, Keisha Jefferies, Shelley McKibbon, Ruth Martin-Misener, Adelina Iftene and Gail Tombin Murphy)
- Pilot Test of a Theory-Based Instrument to Measure Nursing Informatics Leadership Skills (Karen A Monsen and Daniel J Pesut)
- The Relational Role of Managers in Support of Teamwork (Sarah Stahlke and Sherry Dahlke)

**BMJ Quality & Safety** online first articles

- To improve quality, keep your eyes on the road (Marc Philip T Pimentel, John Matthew Austin, Allen Kachalia)
- Using standardised patients to assess the quality of medical records: an application and evidence from rural China (Yuju Wu, Huan Zhou, Xiao Ma, Yaojiang Shi, Hao Xue, Chengchao Zhou, Hongmei Yi, Alexis Medina, Jason Li, Sean Sylvia)

**International Journal for Quality in Health Care** online first articles

- Back to the future: five forgotten lessons for the healthcare managers of today (Giovanni Gibino, Michele Rugo, Marina Maffoni, Anna Giardini)
- The patient died: What about involvement in the investigation process? (Siri Wiig, Peter D Hibbert, Jeffrey Braithwaite)
- Quality & Safety in the time of Coronavirus—Design Better, Learn Faster (John Fitzsimons)
- Editorial: Act now! Covid-19 pandemic: the coordinated support of the international community to low- and middle-income countries is needed immediately
• **COVID-19: Patient Safety and Quality Improvement Skills** to Deploy during the Surge (Anthony Staines, René Amalberti, Donald M Berwick, Jeffrey Braithwaite, Peter Lachman, Charles A Vincent)

• **Human factors and ergonomics** at time of crises: the Italian experience coping with COVID19 (Sara Albolino, Giulia Dagliana, Michela Tanzini, Giulio Toccafondi, Elena Beleffi, Francesco Ranzani, Elisabetta Flore)

• Editorial: Economic analysis of the adoption of **capsule endoscopy** within the British NHS (Alan Lobo, Rafael Torrejon Torres, Mark McAlindon, Simon Panter, Catherine Leonard, Nancy van Lent, Rhodri Saunders)

• Improving compliance to **clinical practice guidelines** with a multifaceted quality improvement program for the prevention of venous thromboembolic disease in nonsurgical patients (Paula Ruiz-Talero, Daniela Cerón-Perdomo, Catalina Hernández-Flórez, Santiago Gutiérrez-gómez, Oscar Muñoz-Velandia)

• **Female cardiologists** in Japan (Atsuko Nakayama, Hiroyuki Morita, Issei Komuro)

*Future Leaders Communiqué*

**Victorian Institute of Forensic Medicine**
Volume 5 Issue 2 April 2020

This issue of the *Future Leaders Communiqué* looks at the coronavirus pandemic. In the face of uncertainty, the editors argue, our best response should be built upon the shared wisdom of our peers and predecessors. Hence, they have drawn on past editions to reflect on the foundations of good practice. The topics on which they reflect – and the past editions they link to – include effective, timely communication, collaborative care, protocols in healthcare organisations, systems of support for junior doctors.

*COVID-19 Critical Intelligence Unit*

The Agency for Clinical Innovation (ACI) in New South Wales has developed this page summarising rapid, evidence-based advice during the COVID-19 pandemic. Its operations focus on systems intelligence, clinical intelligence and evidence integration. The content includes a daily evidence digest and evidence checks on a discrete topic or question relating to the current COVID-19 pandemic. Recent evidence checks date include:

- NIPPV and requirements
- Fibrinolysis and PCI for STEMI
- Pulmonary rehabilitation and COVID-19.

[USA] Effective Health Care Program reports
https://effectivehealthcare.ahrq.gov/

The US Agency for Healthcare Research and Quality (AHRQ) has an Effective Health Care (EHC) Program. The EHC has released the following final reports and updates:

- **Standardized Library of Depression Outcome Measures**
https://effectivehealthcare.ahrq.gov/products/library-depression/white-paper
