

Consultation questions

Draft Emergency Laparotomy Clinical Care Standard

Questions about each quality statement

Quality statements

- Does the quality statement adequately describe the care that should be provided?
- How could the quality statement be improved?

Supporting information

- Does the supporting information for patients, clinicians and healthcare services adequately explain the care described in the quality statement?
- How could the supporting information be improved?

Indicators

- Would the proposed indicators be useful in supporting local clinical quality improvement activities?
- How could the indicators be improved?

Questions about cultural safety and equity

- Is the content on cultural safety and equity in the Standard useful and appropriate?
- How could the cultural safety and equity content be improved?

Questions about the supporting resources

- Does the Consumer Guide adequately explain the care described in the Standard for a consumer audience?
- If not, how could the Consumer Guide be improved?

Final comments on the Clinical Care Standard

- Are there additional areas or aspects of care that should be included in the Standard?
- Please provide any other comments, including any other activities the Commission should be aware of.
