

5 easy steps for glove use

1

Assess the need for gloves

Use gloves only when necessary to improve hand hygiene and reduce waste

2

Choose the right gloves for the task

Sterile, non-sterile, non-medical or utility gloves

3

Perform proper hand hygiene

Hand hygiene must be performed before and after using gloves

4

Wear gloves correctly

Wear only when required and change between tasks and patients

5

Remove gloves correctly

Remove and dispose of gloves safely to avoid self-contamination
