

MedicineInsight

MedicineInsight is a national program aimed at improving quality in primary care. It allows participating general practitioners to reflect on their prescribing patterns and patient care, enabling practices to gauge improvement over time.

Features

- National representative longitudinal data collection
- Robust data governance framework
- No cost to practice or GPs
- De-identified data
- Data remains in Australia
- Data never sold or used for commercial purposes

Benefits

- Personalised *Practice* and *GP Reports*
- Easy, secure access to reports via online portal
- RACGP and ACRRM accredited CPD activities
- Your data alongside all participating practices
- Practice points with recommended activities
- Data refreshed monthly to show changes over time

MedicineInsight contributes to the evidence base for Australian general practice research, benefiting the entire primary care community. MedicineInsight data has supported hundreds of research projects. Find out more and access the entire project register on our website: safetyandquality.gov.au/medicineinsight

- **RACGP and ACRRM accredited CPD activities**

The program is governed by three central pillars:

- RACGP NREEC ethics approval
- Commission Data Governance Framework and Data Plan
- Advisory Groups including Data Governance and General Practice Advisory Group
