

Combined contact and respiratory precautions with a particulate filter respirator mask

Particulate filter respirators (PFR) are also known as N95, P2 or duckbill masks

In addition to standard precautions

ENTERING THE CARE SPACE

1 Clean your hands

2 Put on gown

3 Put on a PFR mask

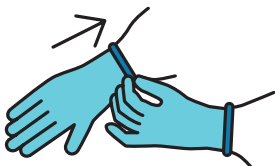

4 Check the PFR mask fits well

- Press it down at the nose bridge across face to create a seal
- Breathe out and feel for air escaping around mask: No air = ✓
- Breathe in and see how mask moves: mask sucking into the face = ✓

5 Put on eye protection or face shield

6 Put on gloves if you think you will come in contact with blood or body fluids

When moving between different care activities, perform hand hygiene before and after each activity and change gloves if they are required.

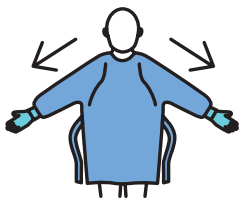

If unsure, escalate to:
