PPE use images reproduced with permission of the NSW Clinical Excellence Commission

What else can you do to stop the spread of infections?

- Consider patient placement
- Use a negative pressure room, where available
- Keep door closed at all times
- Minimise patient movement.

At doorway prior to leaving room/care zone

Perform hand hygiene

Leave the room/care zone

Perform hand hygiene (in the anteroom/outside the room/care zone)

Remove protective eyewear (in the anteroom/outside the room/care zone)

Perform hand hygiene (in the anteroom/outside the room/care zone)

Remove and dispose of particulate filter respirator (in an anteroom/outside the room/care zone)

Perform hand hygiene

Always use standard precautions

- Perform hand hygiene before and after touching a patient or their surroundings
- Use personal protective equipment (PPE)*
- Use respiratory hygiene and cough etiquette

- Use aseptic technique
- Use and dispose of sharps safely
- Perform routine environmental cleaning and maintain a clean and safe healthcare environment

- Clean and reprocess reusable patient equipment
- Handle and dispose of waste safely
- Handle and dispose of used linen safely

* When used as part of **standard precautions**, PPE protects against probable exposure to blood and body substances. When used as part of **transmission-based precautions**, PPE serves as a barrier to specific means of transmission of infectious agents.
