

# Consultation on the Cataract Clinical Care Standard

## Consultation questions:

### Questions about each quality statement

1. Does the quality statement adequately describe the quality of care that should be provided to patients with cataract?
  - a) If No, how could the quality statement be improved? Please provide evidence to support your response.
2. Is the proposed indicator useful for monitoring the care described in this quality statement?
  - a) If No, how could the indicator be improved? Please provide evidence to support your response.
3. What are the barriers or enablers for providing care as described in the quality statement?

### Questions about the clinical care standard

4. The quality statements target areas of care which could benefit from quality improvement. Are there additional aspects of care that should be included?
  - a) If Yes, please describe. What evidence is there to support your response?
5. Are you aware of any validated Patient Reported Outcomes Measures (PROMs) that should be considered for cataract surgery?
  - a) If yes, please describe.

### Questions about the fact sheets

6. Is the fact sheet for clinicians useful?
  - a) If No, how could the fact sheet for clinicians be improved?
7. Is the fact sheet for consumers useful?
  - a) If No, how could the fact sheet for consumers be improved?
8. Do you know of any current or planned initiatives that could support the implementation of this standard?
9. Do you have any other comments?
