

Venous Thromboembolism Prevention

Clinical Care Standard

Seven evidence-based quality statements to help reduce the risk of blood clots during and following a hospital stay

- 1** Timely assessment of clotting risk
- 2** Prevention planning, balancing the risk of clotting against bleeding
- 3** Education and informed decision making
- 4** Documentation and communication of the clot-prevention plan
- 5** Appropriate clot-prevention methods
- 6** Reassessment of risk and monitoring for clot-related complications
- 7** Post discharge care planning

Clinical Care Standards

support clinicians and health services to deliver high-quality care and meet the requirements of the NSQHS Standards (second edition)
